Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Alessia - VOLCOR Beta Zero, class Q (LU1238726811) a sub-fund of Alessia

Objectives and investment policy

Objectives

The sub-fund's investment objective is to seek returns correlated to the European equity markets.

Investment policy

The sub-fund mainly invests in stocks of the Stoxx 600 index and in the Eurostoxx 50 index. If efficient, the exposure to these stocks and financial markets may be (potentially) hedged by opening positions in options and futures on Stoxx 600 and Eurostoxx 50. The sub-fund's strategy aims at extracting positive alpha from the

European stock picking activity while minimizing at the same time the overall beta of the portfolio.

The investor may subscribe, convert and redeem shares on each bank business day in Luxembourg.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This sub-fund is appropriate for investors seeking short-term capital growth.

Risk and reward profile

The indicator describes the fluctuation risk of the net asset value per share and may shift over time.

The category 4 means a moderate risk and consequently moderate potential losses and gains.

The calculation of the risk indicator is based on estimated and historical data which may not be a reliable indication of the future risk profile of the sub-fund.

The lowest category does not mean a risk-free investment.

Several types of risks are not completely taken into consideration by the synthetic risk indicator and can influence the net asset value:

- *Liquidity risk*: Problems of liquidity on the financial markets being able to affect the purchases and sales of positions of the funds.
- *Counterparty risk*: If a counterparty defaults and cannot honour its liabilities, the value of the funds could be influenced negatively.
- *Operational risk*: Failures in the operational processes being able to influence the value of the funds negatively.

Additional information concerning the risks of investment in the sub-fund is indicated in the corresponding section of the prospectus of the fund which is available at the registered office of the fund and on the website www.alessia.lu.
